Newly submitted claims 40 and 41 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: claims 40 and 41 are directed to a “watermark pattern.” The originally presented claims are directed to an “apparatus for exposing a latent watermark” and a “method for exposing a latent watermark.” It is clear that the newly presented “watermark pattern” can be produced by another apparatus or method.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 40 and 41 have been withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

This application is in condition for allowance except for the presence of claims 40 and 41 drawn to an invention non-elected without traverse. Accordingly, claims 40 and 41 have been cancelled.
